DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 9, 10, 14-17, and 21-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Farber et al. US 3,951,906 alone or in view of Hirano et al. US 6,448,316.

3. The rejection under 35 USC 103 as set forth over Farber et al. in the previous office action is deemed proper and is herein repeated.

4. Applicants argue that the Farber et al. patent shows higher amounts of the mica component than that as claimed. This is not persuasive. The amount of mica claimed is rendered obvious from the amounts of mica suggested by Farber. The higher limit of mica shown by Farber overlaps the lower amount claimed. As such it is obvious. Furthermore, there is no showing or allegation of unexpected results that are due to the amount of mica claimed. As such the amount is obvious.

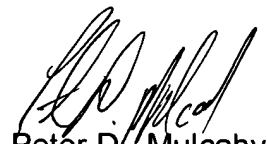

5. The Hirano et al. patent is applied to further show the claimed amount of mica incorporated into styrene acrylonitrile copolymers, see column 6, lines 7-15 and 58+.

Absent a clear showing of unexpected results, the claims are prima facie
obvious. **Conclusion**
